Rivet pliers

Rivet pliers Type A – singlehanded

This tool is very practical for work with Al, Cu and metal rivets diameter for 2,4mm to 4mm.

- Max. body diameter of rivet: 2,2 mm;
- Length of rivet: clenching thickness plus 3-4 mm;
- Diameter of a hole: rivet thickness plus 0.1 mm;

Double sided capsule with possibility of adjusting, allows plucking the needle of a rivet with single closing of arms or, exceptionally closing twice.

With adequate use of pliers it is possible to clench near 15000 rivets without repairing or replacing pressing jaws, which are the essential part of pliers.

Before using pliers, it is necessary to oil it from inside.
